### Understanding the world:

Can you talk about where these insects might live? Have you seen any of these insects before? Can you match these insects to their habitat?

Habitat = where something lives.

### Maths

#### Shape, space & measure:

Silly question game. Ask silly questions involving size and weight, such as: Could a cow sit on a spider's web? Will a horse fit in this small box? Don't forget to ask for an explanation.

**Numbers:** Write out the numbers 0-20 on some paper or card, cut them up and then ask a grown-up to mix the numbers up - don't peek! Then, see how quickly you can put them into the correct order. You could ask someone to time you and then see if you can get faster when you try again.

### Expressive Arts & Design:

Can you make a beautiful web? You can use string or strips of paper to make a spider web.
